Hobbies

Photography, Solo-Travel, Cooking, Carnatic Classical Music.

Profile

- Full-stack web developer with ~5 years of experience in the JS world, with a passion for Front-end development.
- Experience in developing web applications from scratch, and moving projects from older tech stacks to newer ones.
- Expertise in Accessibility (ADA Compliance) on the web.
- Good interpersonal skills; Worked with teams spread across geographies.

Work Experience

Senior Softare Engineer, ProjectPro, Remote

NOVEMBER 2021 — MARCH 2023

- Worked on the rewrite of projectpro.io website - modernizing the tech stack, improving performance and developer experience.
- Set up the new stack which connected to the MySQL DB through Prisma ORM on a NodeJS server, which then connected to the NextJS-React Frontend through GraphQL. Components were styled with TailwindCSS and maintained through Storybook, with Jotai as the state management library. Typescript throughout, with gql-codegen for generating types out of GraphQL.
- Worked on the video player web page which involved converting mp4 videos to hls streams and a note-taking/editing feature. Also worked with the product designer to create a design system for the UI.
- Senior-most developer at the startup - helped different teams with their queries, and creation of dashboards.
- Set up processes to establish good engineering practices and a documenting culture.
- Mentored juniors and helped them get up to speed with React, Node, and Typescript; On boarded them to the new stack.

Software Engineer 2, 1, and Intern, Quotient Technology, Bengaluru

JANUARY 2018 — OCTOBER 2021

- Extensive work on improving accessibility across multiple projects; Was the go-to person for a11y in a team of 20.
- Shipped several mobile-only multi-page features on the SSR React O2 stack.
- Worked on implementing a WYSIWYG CMS app for retailer marketing campaigns called QEM from scratch.
- Added many web-performant features on the e-Commerce RIQW product which had several major retailers in the US as customers, and was being used by millions of users. Refactored several parts of the 8-year-old code.
- Mentored interns and worked with stakeholders across time zones.

Web Development Intern, Goalwise, Bengaluru

MAY 2017 — JULY 2017

- Created a web-app with Flask that would scan eCAS pdf files, extract info through regex, and create portfolios with future projections using APIs.
- Helped automate several days worth of manual work.

Education

B.Tech in Computer Science and Engineering, PES University, Bengaluru

MARCH 2014 — JUNE 2018
